Title: One-Component Nanomedicine

Speaker: Honggang Cui (Assistant Professor, The Johns Hopkins University)

Time: 2016-07-08 (周五) 3:00 PM-4:00 PM

Location: 化新楼B座 211 (篮球场北侧)

Honggang Cui received a Bachelor's degree in Polymer Materials Science and Engineering from the Beijing University of Chemical Technology in 1999, a Master's degree in Materialogy/Chemical Engineering from Tsinghua University in 2002, and a PhD degree in Materials Science and Engineering from the University of Delaware in 2007. He was a Postdoctoral Fellow between 2007 and 2010 in the department of Materials Science and Engineering and the Institute for BioNanotechnology in Medicine at Northwestern University. He joined the Chemical and Biomolecular Engineering Department at the Johns Hopkins University as Assistant Professor in 2010. He holds joint appointments in the Department of Oncology and Sidney Kimmel Comprehensive Cancer Center, and the Center for Nanomedicine of Wilmer Eye Institute at the Johns Hopkins University School of Medicine. He is currently running a fully equipped lab for nanoparticle fabrication, peptide synthesis and purification, and cell culture, with the aims of developing peptide-based supramolecular nanomaterials for targeted drug delivery, tumor imaging and diagnosis, and tumor microenvironment mimicking. He is a recipient of the W. W. Smith Charitable Trust Basic Medical Research Grant in Cancer (2012), the NSF CAREER Award (2013), and the 3M Non-Tenured Faculty Award (2015).
